Tel: (847) 659-0100 • Fax: (847) 659-0108

Declaration of Conformity to EU RoHS 2 and RoHS 3

Image Industries manufactures several thousand different part numbers. The majority of these part numbers are compliant with the current revision of the European RoHS directive (2015/863/EU) of European Parliament and of the Council of 2015 on the restriction of the use of certain hazardous substances in electrical and electronic equipment (also known as “RoHS Recast”).

- All of our stainless-steel products are compliant unless a non compliant finish is specified by the customer
- All of our aluminum products are RoHS compliant
- All of our steel products with zinc and clear chromate finish are RoHS compliant. As of June 2002, hexavalent chrome is no longer used in our clear chromate finish.
- All of our steel products with optional zinc and yellow plating are RoHS compliant. As of March 1, 2006, hexavalent chrome is no longer used in this plating.
- Although a very small number of our steel product, such as hydraulic fittings, are machined from leaded steel bar stock, the Annex of the RoHS directive currently allows this application of lead up to a maximum of 0.35% by weight. Exceptions in the Annex are subject to periodic review and may not remain in effect in the future. Customer may specify a non leaded substitute for these products.
- Brass and phosphor bronze product is RoHS compliant unless the customer specifies a non-compliant finish.

Image Industries will continue to monitor RoHS directives as part of our continued effort to provide quality products that meet the requirements of the customers and markets that we serve.

A handwritten signature in black ink, appearing to read "Reddy Gurujala", is written over a faint, light-colored rectangular stamp or watermark.
